

## Clean, Effective Lubrication Of Most Overhead Monorail And Power And Free Rivetless Power Chains

*OP-4A is the most accurate conveyor chain pin lubricator on the market today.*

- The OP-4A system lubricates chain pins while conveyor is running under normal conditions.
- Automatically deposits a clean, metered shot of oil directly and precisely to chain pins at desired intervals. No waste or mess from over oiling.
- Proper lubrication reduces friction and wear - extends conveyor life.
- Fast payback based on reduced maintenance and extended productive conveyor life.
- Eliminates surging caused by non-lubricated and worn chains, so product can be spaced closer, increasing productivity.
- Helps reduce drive power requirements.
